OUR EXPERTISE

- ✓ **Recovering deleted** files such as documents, graphics, emails, and photos.
- ✓ **Searching unallocated space** on the hard drive, places where an abundance of data often resides.
- ✓ **Tracing artifacts**, those tidbits of data left behind by the operating system.
- ✓ Our experts know how to **find** these artifacts and, more importantly, they know how to **evaluate** the value of the information they find.
- ✓ **Processing hidden files:** Files that are not visible or accessible to the user that contain historical usage information & determine when each file was created, last modified, last accessed, & deleted.
- ✓ Running a **string-search** for e-mail, when the history of e-mail client is vague.
- ✓ Tracking messaging route and gateway hops with the help of **MailXaminer – The Complete Email Forensics Software**, by SysTools.

DEPARTMENT OF INCOME TAX THAT WE SERVE
