

# Smartly Secure Microsoft Office 365 With **SysTools** Office 365 Backup

**SysTools**<sup>®</sup>  
Simplifying Technology

Intelligently designed tool to take backup from all Office 365 Subscription plans

## WHY DO WE NEED BACKUP SOLUTION FOR MICROSOFT OFFICE 365

In this age, MS Office 365 becomes a widely used SAAS based solution on this globe. No doubt! It provides amazing applications for incredible workflow, which is true. Still, there is one problem – Microsoft does not guard your online data of Office 365 from potential data loss events. To be clear, if you do not take a step against this security weakness, it might affect your business. To get comprehensive control over the data against sophisticated situations like malware attack, accidental deletion, it is beneficial to use SysTools Office 365 Backup & Restore Software.

With Office 365 backup and Restore you can manage and protect data with the potential online attacks that harm your Office 365 data. With infinite retention period, saves an offline copy of your Office 365 emails, contacts, and calendars on designated on-premise location. Along with point-in-time recovery feature, restore all the lost or deleted data from backup file whenever you want.

## KEEP AWAY FROM DATA LOSS EVENTS WITH SYSTOOLS OFFICE 365 BACKUP & RESTORE

 No matter which Office 365 plan you are using it protects O365 data
