

A low-angle, upward-looking shot of a modern glass skyscraper. The building's facade is composed of a grid of dark metal frames and large glass panels. The sky is a vibrant blue with wispy white clouds. A bright sun is positioned in the upper right, creating a strong lens flare that streaks across the sky. Overlaid on the entire image is a faint, white network of dots connected by thin lines, suggesting a digital or technological theme.

**WE** INNOVATE TO  
SIMPLIFY  
TECHNOLOGY !

# Innovating for a Safer World

**SysTools Solutions have simplified the lives of millions of computer users and IT admins. Innovative risk management and business compliant data recovery solutions from SysTools have ushered in a new era of smart tools that are cost effective and efficient.**

Being the pioneer, SysTools has been at the forefront of Data Recovery technology under the able leadership of motivated entrepreneurs and talented dynamic duo- Anuraag Singh and Debasish Pramanik since 2007. Today we are a team of 200+ professionals working in several parts of the world. The company has been offering services across a diverse range that includes data recovery, digital forensics, and cloud computing solutions.

We at SysTools provide innovative software applications that enhance efficiency and adds a sense of security to the lives of millions of IT admins and computer users around the globe. The smart tools developed here facilitate data recovery both on-premise and on the cloud even in the most intense and adverse environment. Our objective always has been to deliver foolproof DR plans. SysTools aims at business

compliance and provides risk management solutions in the most proficient and user-friendly way. SysTools understands the user and is, therefore, able to provide the right solution for his or her needs. After making strong strides in the Digital Recovery sphere, we at SysTools are now ready with new products. We also develop innovative tools that assist in digital forensics. We at SysTools are focusing on providing solutions that enable email investigations. Our foray into Digital Forensic space has given us the much-needed competitive edge that now helps us in shaping our future. We are making big inroads in private and Governmental agencies. We help investigations involved in civil and criminal cases by providing critical pieces of evidence and leads.

# Who We Are ?

Today SysTools Software is in the list of topmost recognized brands in the arena of data recovery, digital forensics, and cloud computing. Our range of products are famous among IT experts, system admins, MVP's, business as well as home users. We include solutions for data recovery, digital forensics, file repair, cloud backup, cloud migration, email recovery, etc. The addition of newer software, technologies, and platforms is sign of continuous expansion and growth of SysTools.

SysTools followed a crystal-clear approach to eliminate technicalities faced by enterprises/ corporates across the world and build customer satisfaction. The ideology adopted by the company was to play with brains to develop powerful and reliable products to resolve issues related to Data Recovery, Digital Forensics, Cloud Backup arenas. Since 2007, SysTools is experimenting with technology to provide top-notch services to users as well as organizations through their products.

## Our Mission

The mission is to retain the customer's trust by delivering robust and result-oriented solutions worldwide. Also, to discover new challenges and loops encountered by users while working with technology. The company aims is to develop a bridge over the hurdles of technology by going the extra mile and making customers elated through products and services.

## Our Vision

The strategy was to develop tools to resolve common user's scenarios related to technology such as data corruption, platform migration, forensic analysis, etc. As it is said, Hard Work Pays Off, SysTools has climbed the stairs of success by delivering products according to customers demands and needs. Solutions provided by the company have simplified the lives of millions of people globally. The company has made its inerasable identity in the marketplace by developing incredible software to eradicate issues faced by users in multiple arenas.

# What Do We Do ?

Anuraag Singh  
CEO, Co-Founder

SysTools Solutions have simplified the lives of millions of computer users and IT admins. Innovative risk management and business complaint data recovery solutions from SysTools have ushered in a new era of smart tools that are cost effective and efficient.

SysTools specializes in providing easy to use, cost effective and super-efficient solutions. Our core belief in innovation by using cutting edge technology has lead us into the digital forensic space and we continue to move ahead ensuring we remain alert to the needs of our current and prospective customers.

“

**The clever move to invest heavily on its research team to comprehend the instantaneous trends and anatomy of in depth data has given the company an upper hand over its peers.**

Debasish Pramanik  
Co-Founder, MD

Our core belief in innovation by using cutting edge technology has to lead us into the digital forensic space and we continue to move ahead ensuring we remain alert to the needs of our current and prospective customers. The result is that even the non-technical users are able to use our solutions to accomplish their tasks exactly as they want, even in complex environments.

## **WE** SIMPLIFY TECHNOLOGY

- ✔ SysTools logo itself defines that we believe in simplifying technology for all type of users.
- ✔ Develop reliable, cost-effective and easy-to-use applications to resolve technical issues.
- ✔ Simplify lives in multiple arenas i.e., digital forensics, data recovery, and cloud computing.

## **WE** VALUE YOUR DATA

- ✔ Understand the **importance of your valuable data** that you cannot afford to lose it.
- ✔ **Data recovery, data management & file conversion** solution for proper management.
- ✔ Move for one platform or email application to another with **0% data leakage**.

## **WE** INVESTIGATE EVIDENCE

- ✔ Provide Digital Forensics services to **Income Tax Department** of multiple locations
- ✔ Offers forensics investigation on demand for **Crime Branch, Cyber Cell, New Delhi India**
- ✔ Assistance in email investigation via evidence acquisition, analysis, and reporting.

## **WE** MIGRATE CLOUD DATA

- ✔ Make migration between platforms **easier and convenient** for the users
- ✔ **Cloud Migration services** to move your business to cloud with confidence
- ✔ Users can switch to other platforms via our multiple migration solution

# Our Area of Expertise

The company is proficient in resolving technical challenges faced by users in three major fields that are:

## 1. Data Recovery: We Know Data Is Indispensable (Important) For All!

Data Recovery is a way to retrieve data from any storage media facing data loss disaster. In scenarios such as accidental deletion, hard drive accidental formatting, partition loss, Windows reinstallation, system booting failure, etc. data recovery technique works best. SysTools Data Recovery solutions provide a simplified way to retrieve data from a plethora of platforms.

**Data Recovery**

### A Sneak Peek of SysTools Data Recovery Services

- Exclusive range of data recovery solutions for both Windows and Mac OS.
- No need to worry about formatting and security of data, we take care of them.
- Recover lost data from a variety of storage media: SSD, USB, Hard Drive, SD Cards, etc.
- Both tyro users and technocrats can have effortless hands-on experience with tools .
- Hassle-free to retrieve data from MS Outlook, SQL, PDF, Word, SharePoint, etc.

#### Solutions:

- ⊕ [Outlook Recovery](#)
- ⊕ [Hard Drive Data Recovery](#)
- ⊕ [SQL Recovery](#)
- ⊕ [OST Recovery](#)
- ⊕ [Exchange Recovery](#)

## 2. Digital Forensics: Making Seamless For Investigators to Carve Evidence

In Digital Forensics, investigators need to identify, recover, investigate, validate and present digital evidence found on computers or similar digital storage media devices. Digital Forensic Solutions provided by SysTools lets the users get back data from various email applications in a secure and smart way. The company offers a diverse range of tools to perform Email Forensics, view contents of a file, manage evidence PDF file and much more.

### Digital Forensics

#### Shed Some Light On SysTools Digital Forensics Services

- Analyze and search suspected emails gathered as evidence from different email platforms.
- Retrieve data safely from files and view contents to forge evidence directly the from software's dashboard.
- Extraction of evidence in a presentable format at the time of litigation
- Discovering and locating a specific file type from a machine or within a network.
- Present the data as it is without hampering hash values, formatting, etc.

#### Solutions:

- ⊕ [SQL Log Analyzer](#)
- ⊕ [Exchange Log Analyzer](#)
- ⊕ [MailPro+](#)
- ⊕ [Email Duplicate Analyzer](#)
- ⊕ [MailXaminer](#)

### 3. Cloud Backup: A Must Need Strategy For Online Data Protection

Online Backup or Cloud Backup involves backing up data by sending a copy of the data over a proprietary or public network to an off-site server. SysTools has expertise in numerous custom-built cloud applications and cloud-oriented services to help the organizations to migrate cloud data to local storage and vice versa in a simplified way.

**Cloud Backup**

#### A Glimpse of SysTools Cloud Backup Solutions

- Enhance the data protection and access by storing cloud data locally as Backup.
- No chance of cloud data vulnerabilities: Server Downtime, Hacking, etc.
- Protect data associated with Google Apps, Yahoo, Office 365 and other platforms also.
- Easy management of cloud data locally on the system.

#### Solutions:

- ⊕ [Google Apps Backup](#)
- ⊕ [Office 365 Backup and Restore](#)
- ⊕ [Hotmail Backup](#)
- ⊕ [Yahoo Backup](#)
- ⊕ [Gmail Backup](#)

## 4. Cloud Migration: Move Your Business to Cloud With Confidence

Migration between or to the cloud is not easy at all. Having a partner with a flexible and reliable solution can bring you success quickly. Being in the list of leading Cloud Migration service Providers, SysTools will help your organization to attain a seamless and secure cloud migration. We have huge experience in managing the cloud services by offering loss-less migration. Our main aim is to make sure that your cloud migration project is completed in as smooth a way as possible. # Our Major Clients

Our success is very much dependent on the partnership that we have created with our clients. They help us really well in serving our clients and effectively offering great return on investment. Some of our major clients are listed below:

# Our Services

SysTools offer multiple professional services in IT sector. Our services are best in recovering and analyzing database in an efficient manner. We have a team of experts with great industry experience that can extract data from almost all types of devices.

## Managed Security Service

SysTools is one of the leading Managed Security Service Providers (MSSP) and makes sure to deliver secure infrastructure. We simplify the security operations and reduce the risks by minimizing the cost and complexities. The Managed

Security Services offered by SysTools is:

- ⊕ **Endpoint Security**
- ⊕ **Cloud Security**
- ⊕ **Digital Forensics Services**
- ⊕ **Security Operation Center**

## Security Operations Centre (SOC) Service

We offer SOC services that will monitor and analyze the security state of your organization. Our SOC service also makes sure that a complete information system is monitored, evaluated, and prevented in a secure way.

## Digital Forensics

We offer many digital forensics services also to for proper management of all digital evidence safe and secure. We are experienced in providing forensics services in:

- ⊕ **Cyber-Crime Investigation**
- ⊕ **Computer Forensics**
- ⊕ **CCTV Forensics**
- ⊕ **Mobile Phone Forensics**
- ⊕ **Cell Site/Data Analysis**
- ⊕ **SatNav Forensics**

## Recovery Services

The Recovery Services provided by SysTools helps in recovering your valuable data. Our main motive is to recover everything without any data loss.

- ⊕ **Physical Data Extraction**
- ⊕ **RAID Server Recovery**
- ⊕ **Tape recovery**
- ⊕ **Forensic Recovery**

## Cloud Migration Services

SysTools Services offers users a convenient solution to move between clouds as per their requirement. Our Exchange Server migration services are programmed to manage your cloud migration process in an efficient manner with a successful result. SysTools Cloud Migration services are works best in following:

- ⊕ **Remote Migration Services**
- ⊕ **On-site Cloud Migration**
- ⊕ **Project Management & Reporting**
- ⊕ **Manage Services & Infrastructure**

## Mobile Device Recovery

We offer services to recover lost or damaged data from mobile phones, SD card, and memory card of all type. In addition, we are expert in recovering lost data from the following types of storage media:

- ⊕ **Digital Camera Recovery**
- ⊕ **USB Drive Recovery**
- ⊕ **SD Card Recovery**
